

# Local Labour Market Information

## September 2018

**Our Manchester**

# Large Sectors v Growth Sectors

- Every year a report is produced for Greater Manchester, which looks at data about business and economic growth.
- The Council uses this to look at how Manchester is doing now, and how it may develop in the future.
- It shows which job sectors which employ the **largest** numbers of people. It also looks at the ones which are **growing the fastest**
- Then it tries to predict what will happen in the future, up until 2027

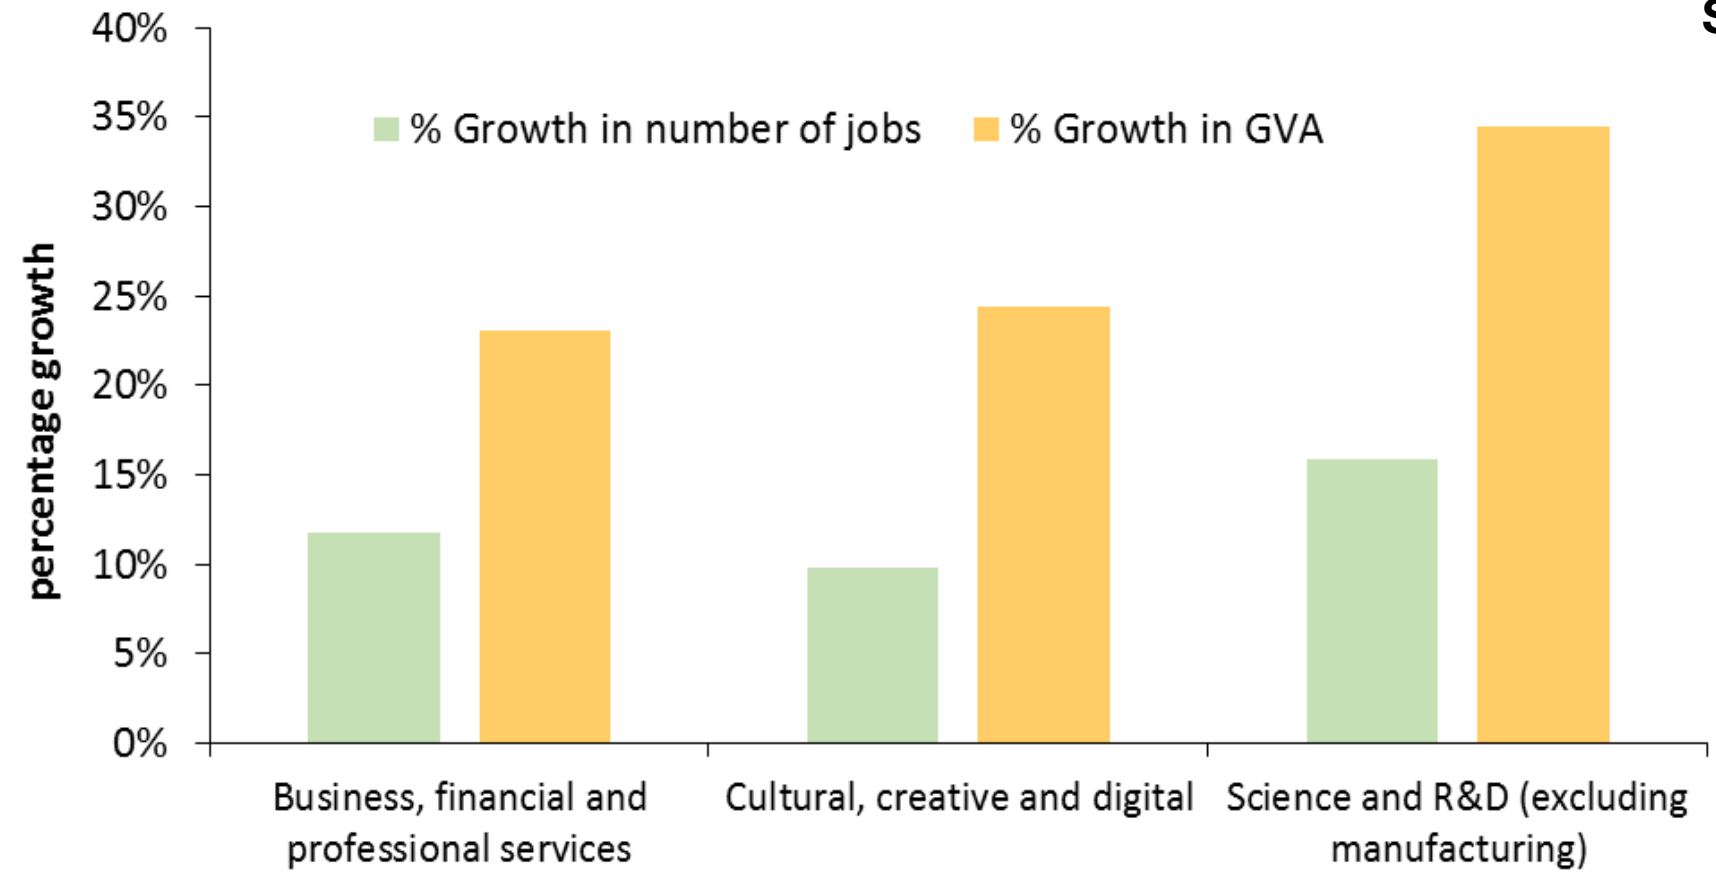

# What are job sectors and why is this important

- Often in the world of work many companies and job titles are related and/or have related skills.
- Construction is one example – there are many different companies and job roles but they are related. When we group work / jobs / occupations together they are called sectors.
- With Large Sectors and Growth sectors there will be a (rising) demand for **people with the skills** to work in these areas.

## Where will the future jobs be?

Manchester  
jobs market

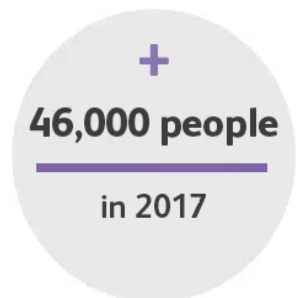

**Growth  
Sectors**
